

Putting Filler Ads on the Bottom of Short Field Program Pages

Adobe Acrobat Pro

- 1) Open saved pdf program pages document
- 2) Open tools (on right side of page)
- 3) Open content editing
- 4) Open Add Image – this will open up a new window where you can pick the filler ad or anything else you have saved to your computer
- 5) Double click to add the image, it will then appear on your program page where you can move it into position
- 6) If you need to add some text to the bottom of the program page, just click the add text button and a box will open up and you can write in whatever you want to

To put your program pages all together in one file (covers and race pages)

- 1) Open the pages tab (on the right side of page)
- 2) Insert pages
- 3) Insert from file – this will open up a new window where you can pick the page you want from where it is saved on your computer. You can pick many types of files to insert including word documents
- 4) A box will appear and you pick where you want it to insert and it will place that page into your program document.
